BIRKELAND CURRENT
driven by change

GATEWAY
ADVANTAGES

PERSONAL
SECURITY

Proprietary firmware developed for device agnostic and security specific features

Over Air firmware updates allows new manufacturer or device type readings

Disconnects from network at completion of measurement

Automatically reconnects to network when measurement begins

Enables unique database device management architecture to isolate from near neighbors in ALF or SNF.

DIRECT
CONNECTIVITY

Direct connectivity of devices out of box. No pairing required.

3-5X Cost savings per unit over 3rd party gateway. Enables Medicare/Medicaid payments to cover H/W cost.

3-5x Monthly data plan cost savings. Enables Medicare/Medicaid payments to cover connectivity.

CELLULAR
DATA

Takes advantage of newest IoT cellular components for cost savings optimization.

NBIoT bands as countries add capability.

E SIMs to reduce parts, cost, assembly.

COMPATIBLE
DEVICES
