The most advanced remote patient monitoring and care management system for hospitals, homes, patients, providers, caregivers, and payors

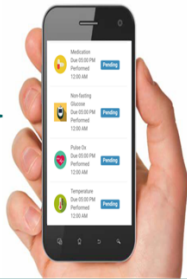

Patient Monitoring, Management, and Interaction Tools

Patients, caregivers, and medical staff, have the tools they need.

The OneCare Platform's Care Program Management Tools

- Care programs for daily assessments and tasks to perform
- Care program notifications and alerts
- Daily care program adherence scoring
- Behavioral, clinical, and nutritional education and certification
- Connected, trained, and certified family caregivers
- Connected medical devices, medication management
- Preemptive, interventional care coordination
- Personal Health Records, clinical dashboard, custom reporting

Benefits of Implementing OneCare for Hospitals

Top 3 Benefits:

1. Reduce hospital wait times and readmissions
2. Decrease length of stay
3. Improve overall health and wellbeing

Additional Benefits Include:

- Revenues:
 - Increase hospital and provider revenues
 - Reveal and recover unrealized prior year revenues
 - Create new recurring revenue streams
- Reduce Risks:
 - Reduce the number of hospital "visitors"

- Reduce disease and infection rates and expenses
- Prevent avoidable healthcare episodes
- Telehealth and Selfcare:
 - Convert ED visits to Telehealth
 - Improve patient and family health literacy
 - Certifying the patient for Selfcare
 - Engage family care coordinators
 - Certifying the patient's family for care coordination
 - Equipping the patient's home with Telehealth
 - Make healthcare more accessible for patients
 - Open a new method of communication between the clinician and patient
- Improve patient wellness:
 - Perform annual wellness visits and medically necessary follow-ups
 - Optimize patient's risk factor adjustments
 - Reduce patient wait times for care
 - Maintaining a daily patient adherence score
 - Improve patient satisfaction scores
 - Better patient retention
- Grow the hospital's patient base
- Ancillary benefits of using OneCare:
 - Stretch hospital staff resources & efficiencies
 - Utilizes an ALCOA Compliant Clinical Trial Quality Data Capture system
 - Attract more clinical trials and research projects
 - Increase hospital donor base and contributions
 - Great press release opportunities for all these items
